MAT204 - PROBABILITY AND STATISTICS									
Course Code	Course Code Course Name Semester								
MAT204	Probabil	ity and Statistics	Fall □ Spring ⊠						
		Course Hours	Credit						
Theory Application Labora				- 3	5				
3		3	5						

Course Details	
Department	Software Engineering
Course Language	English
Course Level	Bachelor's Degree ☑ Master's Degree □
Education Type	Formal Education ⊠ Distance □ Hybrid □
Course Type	Compulsory ⊠ Elective □
Course Objectives	To teach engineering students the necessary probability and statistical techniques, to be able to interpret the results of statistical analysis and to make correct statistical decisions.
Course Content	Application of basic concepts in probability and statistics with engineering. Topics: descriptive and inferential statistics, probability, discrete and continuous random variables, confidence interval estimation, regression and correlation, analysis of variance.
Course Methods and Techniques	Lecture ☐ Question-Answer ☐ Presentation ☐ Discussion ☐
Prerequisites	Math
Workplace Status	-

Recommended Books

Weekl	y Schedule
No	Topics
1	Introduction to Statistics: History, Subject, Classification, Stages and Statistical Definitions and Concepts
2	Distributions and Classification: Frequency and Cumulative Frequency Distributions
3	Measures of Central Tendency
4	Measures of Central Dispersion
5	Random Variables and Probability Distributions; Conditional Probability and Bayes Theorem
6	Discrete Probability Distributions (Binomial, Poisson, Hypergeometric)
7	Normal Distribution
8	Midterm Exam
9	Sampling Theory
10	Statistical Forecasting Theory
11	Confidence Interval and Confidence Limits
12	Statistical Decision Theory (Hypothesis Testing)
13	Regression and Correlation Analysis
14	One-Way Analysis of Variance (ANOVA)
15	Two-Way Analysis of Variance
16	General Exam

Course	Learning Outcomes
No	Description
Ö1	Define the basic concepts of probability and statistics.
Ö2	Calculate types of probability, independent events, Bayes theorem and conditional probability.
Ö3	Summarize and interpret engineering problems using descriptive statistics.
Ö4	Solve engineering problems with inferential statistics (hypothesis testing).
Ö5	Solve and interpret statistical problems using computers, in addition to the ability to calculate with formulas to solve engineering problems.
